What's more soothing than the sound of moving water? Redirecting a stream to run through your home or office may not be practical, but tiny, reliable electric pumps make it possible for you to create a small, indoor tabletop fountain; install a spouting sculpture in your backyard; or even build a full-size waterfall on your property.

This new paperback edition of *Simple Fountains* gives you illustrated, precise, easy-to-follow, step-by-step instructions for building 20 aesthetically interesting waterworks at a fraction of the cost you'd pay for those found in upscale catalogs. Using readily available materials (Adkins even includes hints for finding suitable recyclable materials) and simple crafting techniques, you will learn to custom-design your own water-filled masterpiece. In this beautifully designed, inspiring book, Adkins reviews the types of materials you can use for your fountain, including wood, bamboo, ceramic, stone, and copper. She discusses accessories such as flowers, shells, bonsai trees, sculpture, and fish. And she recommends specific products that will make you happier with the finished product (small magnet-driven fountain pumps, for example, tend to be the quietest on the market). Even if you consider yourself non-crafty, Adkins's can-do attitude will give you the confidence to build a beautiful fountain for any corner of your office, home, or garden.
