Mineral Wool: Production and Properties (Woodhead Publishing in Materials)

Mineral Wool: Production and Properties (Woodhead Publishing in Materials)

Mineral wool has a unique range of properties combining high thermal resistance with long-term stability. It is made from molten glass, stone or slag that is spun into a fibre-like structure which creates a combination of properties that no other insulation material can match. It has the ability to save energy, minimize pollution, combat noise, reduce the risk of fire and protect life and property in the event of fire.

Mineral wool: Production and properties describes the technological process of mineral wool production and the physical characteristics of the melt and theoretical bases of multiregression and dimensionless theory. This is followed by the introduction of the fibre cooling model in the blow-away flow and the influence of temperature in the melt film (on the rotating centrifuge wheels) on the thickness of forming fibres.

The second part predominantly focuses on the use of computer-aided visualisation: tools for the diagnostics of fibre and primary layer formation. Special attention is given to the study of aerodynamic characteristics of the airflow which significantly influences the quality of the final product.

Mineral wool: Production and properties is suitable for engineers, researchers and for graduate and postgraduate students who want to broaden their knowledge of experimental methods in this field.

From reader reviews:

Sarah Alexander:

The book Mineral Wool: Production and Properties (Woodhead Publishing in Materials) make you feel enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can to become your best friend when you getting tension or having big problem with the subject. If you can make looking at a book Mineral Wool: Production and Properties (Woodhead Publishing in Materials) to become your habit, you can get much more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You may know everything if you like open up and read a reserve Mineral Wool: Production and Properties (Woodhead Publishing in Materials). Kinds of book are a lot of. It means that, science publication or encyclopedia or other folks. So , how do you think about this reserve?

Roberta Bourland:

The book Mineral Wool: Production and Properties (Woodhead Publishing in Materials) can give more knowledge and also the precise product information about everything you want. So just why must we leave the great thing like a book Mineral Wool: Production and Properties (Woodhead Publishing in Materials)? A number of you have a different opinion about reserve. But one aim that will book can give many facts for us. It is absolutely suitable. Right now, try to closer along with your book. Knowledge or facts that you take for that, you may give for each other; it is possible to share all of these. Book Mineral Wool: Production and Properties (Woodhead Publishing in Materials) has simple shape nevertheless, you know: it has great and large function for you. You can search the enormous world by open and read a guide. So it is very wonderful.

Eva Oleary:

As we know that book is very important thing to add our expertise for everything. By a guide we can know everything we want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This guide Mineral Wool: Production and Properties (Woodhead Publishing in Materials) was filled concerning science. Spend your spare time to add your knowledge about your technology competence. Some people has various feel when they reading some sort of book. If you know how big benefit of a book, you can really feel enjoy to read a publication. In the modern era like currently, many ways to get book that you just wanted.

Catherine Estey:

Publication is one of source of knowledge. We can add our knowledge from it. Not only for students and also native or citizen require book to know the up-date information of year to help year. As we know those books have many advantages. Beside we add our knowledge, can also bring us to around the world. By book Mineral Wool: Production and Properties (Woodhead Publishing in Materials) we can get more advantage. Don't you to definitely be creative people? To get creative person must choose to read a book. Just simply

choose the best book that suitable with your aim. Don't always be doubt to change your life with that book Mineral Wool: Production and Properties (Woodhead Publishing in Materials). You can more appealing than now.
