In this masterpiece of research, a splendid supplement to Ezra J. Warner's *Generals in Gray*, Bruce S. Allardice brings to light a neglected class of officers: the Confederacy's "other" generals -- men who attained their rank outside the usual avenue of appointment by President Jefferson Davis and who had been virtually forgotten as a consequence. Explaining that the process of becoming a general was fraught with politics, lobbying, intrigue, accident, mismanagement, and chance, Allardice identifies six main categories of legitimate claimants to the rank of Confederate General -- two more than historians have traditionally recognized. He presents a substantial biographical sketch of 137 generals not found in Warner's original and a short bibliography of each. For the vast majority, his is the first treatment ever published.
